

# Robi Fathoni

Born: 1973 in Palembang, Indonesia

Bachelor of Fine Art, *Institut Seni Indonesia (ISI)*, Yogyakarta

His realist graphite on canvas figurative works has earned Robi Fathoni the reputation of being one of the emerging artists of his generation to look out for.

Having explored figurative expressions of adults in his previous works, his more recent drawings and paintings turn to children as the focus. This is particularly evident in the five group exhibitions he participated in during Jogja Artweeks in 2016.

A master in the use of graphite (black and color), Robi frequently uses other media in addition, providing additional dimensions to his artworks.
